

BSX400

Single Boot Scrubber - Wet

The BSX400 is a wet, single boot scrubber. It uses two stationary side brushes and one rotating sole brush to thoroughly clean the boot. The user places one foot at a time into the unit and activates the system by grabbing the hand rail. Diluted cleaning solution is sprayed onto the brushes and transferred onto the boot from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. We recommend using Alpet® No-Rinse Quat Sanitizer with the BSX400 to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The BSX400 is ideal for tight spaces and low traffic applications.

Features

- Solid member stainless steel frame construction and hand rail
- One removable sole brush and two removable vertical side brushes
- Two stainless steel right angle gearboxes for vertical side brushes
- Stainless steel electrical enclosure with variable speed drive, timer and e-stop
- Photo eye sensor mounted on handle for unit activation
- Stainless steel washdown rated 1/2 hp motor and worm gear reducer
- Solenoid activated brush spray system with Venturi injector for sanitizer with flow rated at 1.5 Gpm
- Removable stainless steel access grate
- Self draining tub with four adjustable feet

Connection Requirements

- 110V ac, 15 amp electrical connection required
- 3/8" Nptf cold water connection, 50psi recommended
- 1.5" Tri-clamp drain connection
