

BSX800

Compact Walk Through Boot Scrubber Unit

The BSX800 is a wet, walk through, dual boot scrubber. The user activates the system by stepping onto the platform. Diluted cleaning solution is sprayed onto rotating brushes and transferred onto the boots from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. We recommend using Alpet® No-Rinse Quat Sanitizer with the BSX800 to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The BSX800 uses two rotating disk brushes to clean sides and sole of boot, while the BSX800-V uses 3 vertical rotating brushes and one horizontal sole brush. Both have a small footprint and are ideal for tight spaces and medium traffic applications.

Features

- Solid member stainless steel frame construction
- Hinged stainless steel access grate, two removable stainless steel steps, removable combination brush assembly with one brush for each sole and four disk brushes for sides of feet
- Stainless steel electrical enclosure with variable speed drive, timer and e-stop
- Proximity sensor and spring loaded grate for unit activation
- One stainless steel washdown rated 1/2hp Motor and worm gear reducer
- Self draining tub with four adjustable dairy approved feet
- Solenoid activated brush spray system with Venturi injector for sanitizer with flow rated at 1.5 Gpm

Connection Requirements

- 110V ac, 15 amp electrical connection required
- 3/8" Nptf cold water connection, 50psi recommended
- 1.5" Tri-clamp drain connection
