The CDC states that the most important thing you can do to stay healthy is to keep your hands clean. By following these four easy steps and using products from Best Sanitizers, your school can dramatically reduce the spread of germs and become a healthier environment for both staff and students!

1. Hand Sanitizer Stations
2. Touchless Dispensers
3. Surface Wipes & Disinfectants
4. Early Education

Studies Show...

when hand sanitizers are introduced into the classroom, along with a hand hygiene education program, schools can experience a 20%-50% reduction in absenteeism due to illness, which increases the benefits of higher attendance!

1. Hand Sanitizer Stations

*Place them in:*
- Classrooms
- Cafeteria*
- Teacher’s lounge
- Offices
- Nurse’s station
- Gym / multi-purpose rooms

*Smart-San Hand Sanitizer Spray meets FDA regulations for use in food service areas and is certified Kosher and Pareve.

When to sanitize:
- Upon entering the classroom
- Before snacks / lunch
- After using the restroom
- After coughing or sneezing
- More frequently during cold or flu outbreaks

2. Touchless Dispensers

Touchless dispensers eliminate the risk of cross-contamination that can come from students touching the same dispenser. Best Sanitizers has a variety of touchless dispensers to choose from, as well as manual dispensers for less critical areas of your school. Our VersaClenz All-In-One Hand Hygiene System gives you access to our entire line of sprays, foams, liquids, lotions, soaps and sanitizers. One dispenser does it all!

3. All-Purpose Surface Wipes

*Smart-San® All Purpose Wipes* are great for cleaning both hands and surfaces. Formulated with emollients to keep hands feeling soft and moisturized. 160 wipes per canister.

4. Surface Sanitizer/Disinfectant

*Alpet® D2 Surface Sanitizer* is a ready-to-use, surface sanitizer for food contact surfaces and disinfectant for non-food contact surfaces. This product kills 99.999% of 9 tested bacteria, and as a disinfectant kills the following viruses:
- Avian influenza H9N2
- Enterococcus faecium VRE (ATCC 51559)
- Human Immunodeficiency Virus Type 1 (HIV-1)
- Influenza A 2009 H1N1 (formerly called Swine Flu)
- Mycobacterium bovis (BCG)
- Norovirus
- Staphylococcus aureus MRSA (ATCC 33591)

5. Early Education

Early education about hand sanitation can build the foundation for a lifetime of good hygiene. Best Sanitizers offers instructional signage for hand sanitizing stations and educational posters that can be downloaded in PDF form and PowerPoint™ CD presentations. We also recommend the, “It’s a Snap” program materials offered FREE at www.itsasnap.org (includes a planning checklist, statistics and curriculum for teaching kids about hand hygiene).
