To Whom It May Concern,

ALPET Q E2 Sanitizing Foam Soap is a gentle skin cleanser formulated from an antimicrobial agent, mild surfactants, humectant, color, preservatives and fragrance. The ingredients are Water, glycerin, Cocamidopropyl Betaine, polyethylene-polypropylene glycol, benzyl alcohol, phenoxyethanol, tetra sodium EDTA, dehydroxyacetic acid. None of these are generally recognized as allergens. In preparing the formula, there are no soy components added, nor almond oil, peanut components, tree oil, sesame seeds or other well-known allergens. The product does contain materials derived from Coconut Oil.

Our raw chemistry components are USP or comparable grade. In addressing the issue of Allergen proteins, the ingredients are refined to remove any plant or animal proteins prior to manufacturing.

Sincerely,

A handwritten signature in blue ink, appearing to read 'C. Linville', is positioned above the typed name.
