

SUPERIOR HYGIENE & SANITATION SOLUTIONS

**For Food Processing and
Food Handling Professionals**

Celebrating 30 Years of Excellence

1995

Best Sanitizers, Inc (BSI) is founded in Penn Valley, California

2001

BSI is the first company to achieve a D2 rating for alcohol/quat-based surface sanitizer

2008

First expansion at Walton, Kentucky facility completed totaling 50,000 sqft

1996

BSI is the first company to achieve an E3 rating for alcohol-based hand sanitizer

2006

New manufacturing facility in Walton, Kentucky goes into operation

2015

Second expansion at
Walton, Kentucky facility
completed totaling 120,000 sqft

2020

Open new warehouse facility
in Walton, Kentucky
totaling 45,000 sqft

2010

Headquarters relocate
to Nevada City, CA

2017

Introduces a quat-free
surface sanitizer to the
Alpet® D2 family of products

WHAT DO WE DO?

**We keep
the world's food
supply safe.**

Since 1995, Best Sanitizers, Inc. has provided the food processing and food service industries with the highest quality products and support. We continue to explore better ways to deliver innovative hand and surface hygiene solutions. Our stringent practices and policies ensure that our products do what we say they'll do ... *so you can use them with confidence.*

**We help you
take the
guesswork
out of being
compliant.**

CORPORATE HEADQUARTERS

Nevada City, California

MANUFACTURING FACILITY

Walton, Kentucky

Our manufacturing facility is a cGMP, FDA and EPA/FIFRA compliant factory. In addition to the wide variety of quality products manufactured under the Best Sanitizers, Inc. name, we also produce private brand products for many Fortune 500 companies. Our 28-year track record of consistency and innovation has established Best Sanitizers, Inc. as a trusted partner and reliable manufacturer of the highest quality hand soaps, hand sanitizers, surface sanitizers, wiping systems and dispensing options.

- cGMP, FDA and EPA/FIFRA compliant factory
- Highest QA and QC standards and practices
- Private label blending for multiple Fortune 500 companies

OUR STORY

It's not just a transaction, it's a relationship for us.

We opened our doors in 1995 striving every day to bring our customers the best service possible. Our family-based company proudly strives to attend to the specific needs of each of our clients with excellent customer service and competitive low pricing. Over the years, we've built lasting relationships grounded in trust, reliability, and results. Our team brings decades of industry experience and a hands-on approach to every project. We're proud of our roots and excited for what the future holds as we continue to grow and serve our valued customers.

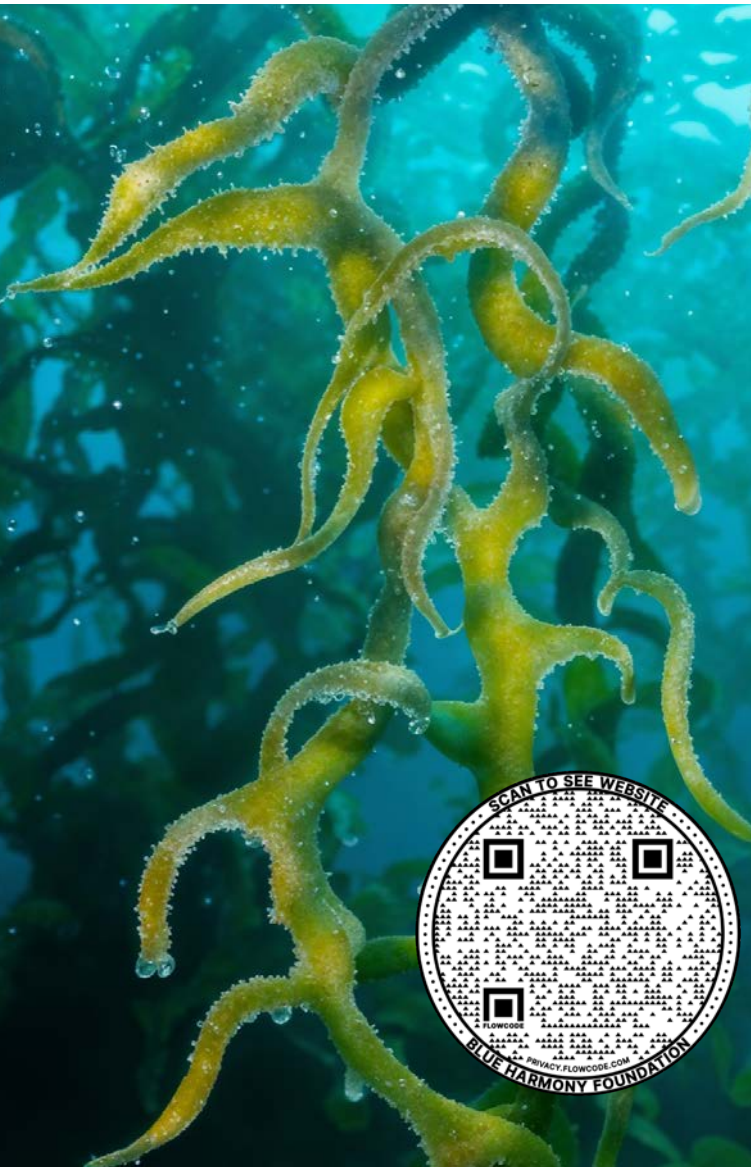

OUR FOUNDER

In 1995, Best Sanitizers was founded by Mr. Hillard Witt. Hillard started the company out of his home and, in the early years, used contract manufacturers for all products. Mr. Witt oversaw the company's growth and initial factory construction in 2006 as well as the two subsequent expansions in 2008 and 2015, which now provide for 200,000 square feet in manufacturing and warehousing capacity. Hillard Witt, is also a co-founder of Blue Harmony Foundation and a dedicated advocate for ocean health and biodiversity. His expertise and passion drive their mission to protect marine ecosystems, shaping sustainable solutions for a thriving future.

OUR PASSIONS

Best Sanitizers, Inc. is a proud sponsor of the Borneo Conservation Trust. Co-founded by our parent company, Saraya Co., Ltd., the Borneo Conservation Trust is committed to preserving the natural habitat of Borneo's most endangered species

Blue Harmony

Blue Harmony, is a 501(c)(3) nonprofit dedicated to restoring ocean health and protecting marine biodiversity through community action, education, and innovative partnerships. Blue Harmony envisions oceans that are vibrant, resilient, and teeming with life. Blue Harmony's mission is to restore and protect critical marine habitats—like kelp forests and coastal ecosystems—that are under threat from climate change and pollution. They believe in the power of collective action and community-driven conservation to create lasting change. By connecting individuals, communities, and organizations, they foster a culture of stewardship and innovation. Through hands-on projects, partnerships, and outreach, BH aim's to inspire future generations to care for our oceans. Together, we can build a legacy of ocean health and ensure that the beauty and bounty of the sea endure for generations to come.

SALES SUPPORT

EXPERTS IN THE FOOD PROCESSING FIELD

Best Sanitizers provides field sales support and training for the entire United States, divided among seven Regional Sales Managers, who are experts in the food processing industry, HACCP certified and trained. The Regional Sales Managers work in coordination with our Inside Account Managers located in our Nevada City, CA Corporate Headquarters.

No-Rinse, Alcohol/Quat Cleaner, Surface Sanitizer and Disinfectant

With new claims and uses, Alpet® D2 Surface Sanitizer can now do even more to reduce the risk of cross-contamination in your facility.

- Ready-to-use, no-rinse cleaner, surface sanitizer and disinfectant
- 58% IPA/Quat formula
- Kills 99.999% of 9 tested pathogens as a food contact surface sanitizer
- 60 seconds to sanitize food contact surfaces, including non-porous gloves¹
- 10 seconds to sanitize non-food contact surfaces, including non-porous footwear²
- 5 minutes to disinfect hard, non-porous surfaces
- Highly evaporative / non-corrosive / ideal for water sensitive equipment and low-moisture environments
- NSF listed D2 classification
- EPA registered
- Kosher, Pareve and Halal certified

Efficacy: Alpet® D2 Surface Sanitizer is an effective sanitizer and disinfectant against the following pathogens on hard, non-porous surfaces.

¹ Food Contact Surfaces ² Non-Food Contact Surfaces

Sanitization:

*Enterobacter sakazakii*¹
*Escherichia coli*¹
Escherichia coli O157:H7¹
Klebsiella pneumoniae^{1,2}
*Listeria monocytogenes*¹
*Pseudomonas aeruginosa*¹
*Salmonella enterica*¹
Staphylococcus aureus^{1,2}
*Vibrio cholerae*¹

Disinfection*:

Staphylococcus aureus
Staphylococcus aureus MRSA
Enterococcus faecium VRE
Escherichia coli O157:H7
Pseudomonas aeruginosa
Listeria monocytogenes
Salmonella enterica (formerly choleraesuis)
Norovirus (Feline Calicivirus as surrogate)
Influenza A H1N1
Hepatitis B Virus
Human Immunodeficiency Virus Type 1 (HIV-1)

BEST SANITIZERS INC.
Alpet®
 Surface Sanitizing **D2**
 Wipes

Self-closing lid
helps prevent
drying

For Use in Food Processing Plants, Retail and Food Service Establishments

Alpet® D2 Surface Sanitizing Wipes are a durable, ready-to-use, no-rinse, lintless wiping system. Alpet® D2 Surface Sanitizing Wipes are available as a 90 count heavy-duty wipe or a 160 count medium-duty wipe. As with all Best Sanitizers wiping systems, the spring-loaded lid closes on its own to prevent the wipes from drying, which helps eliminate unnecessary waste.

- Clean and Sanitize with one product
- Sanitizes Food Contact and Non-Food Contact Surfaces
- Kills 99.999% of Staphylococcus aureus, Escherichia coli, Salmonella enterica (formerly typhimurium), and Listeria monocytogenes as a food contact surface sanitizer.
- Kills 99.9% of tested pathogens in 10 seconds as a non-food contact surface sanitizer
- 58% IPA/quat formula ideal for water sensitive equipment
- Ready-to-use, no-rinse, lintless wipe for food contact surfaces
- Spring-loaded lid to prevent drying
- NSF listed D2 classification
- Kosher, Pareve and Halal certified

Also Available:

Best Refillable Wiping System

- Dry wipes in 90 or 160 count
- Fill with the product of your choice
- Reusable canister w/ spring-loaded lid to prevent drying

GLOVE JUICE IS REAL

TAKE FOOD SAFETY INTO YOUR OWN HANDS

Once hands are placed in a glove, the glove provides a desirable environment for the remaining organisms to proliferate, as they are protected from light and have a warm moist environment. The increased microbial activity within gloves is referred to as “Glove Juice” in our industry. Glove Juice is the name given to the bacteria-rich moisture that can form inside workers gloves when proper hand hygiene practices are not followed.

Peracetic Acid (PAA) is an ideal antimicrobial solution used widely throughout the food processing industry.

Depending on the dilution, peracetic acid can be used to sanitize food contact and non-food contact surfaces, and can also be added to brines, washes and ice to slow spoilage and add shelf life to produce, meat, poultry and seafood. Our full line of peracetic acid products make for a powerful solution in the fight against pathogens.

Alpet® PAA 5.6% Antimicrobial Solution

An ideal antimicrobial agent due to its high oxidizing potential, and is highly effective against a broad range of microorganisms. It is NSF listed D2 classification, and OMRI certified, making it ideal for use in organic facilities. Use with Perafoam™ foaming additive for prolonged contact with problem areas.

- Broad spectrum oxidizing biocide
- Use in sanitation of both organic and conventional food and beverage plants
- Use on conveyors, pipelines, equipment, floors, drains, walls, animal housing, and more
- Optimum performance below pH 8.6, but effective up to pH 9.5
- Lowers alkalinity to allow higher cycles of concentration than hypochlorite
- Safe for discharge to land or for surface irrigation
- NSF listed D2 classification
- Kosher, Pareve and Halal certified

See page 32 for proportioning & dispensing equipment options.

Alpet® PERA FC 15% Antimicrobial Solution

Alpet® PERA FC 15% is an FDA-approved antimicrobial specifically formulated for use in ice and water that directly contacts meat, poultry, seafood, fruits and vegetables. When used as directed it will help to reduce cross-contamination of edible food products.

- Use in washes and brines
- Use in water or ice that contacts non-raw fruits and vegetables
- Use in water or ice to commercially process or store seafood
- OMRI listed for use in certified organic facilities
- Kosher, Pareve and Halal certified

Alpet® PERA FC 22% Antimicrobial Solution

Alpet® PERA FC 22% is a concentrated version of Alpet® PERA FC 15% developed for use in Federally Inspected meat, poultry and seafood processing locations. When used as directed, it will help to reduce cross-contamination of edible food products.

- Use in washes and brines
- Use in water or ice that contacts non-raw fruits & vegetables
- Use in water or ice to commercially process or store seafood
- OMRI listed for use in certified organic facilities
- Kosher, Pareve and Halal certified

Our BSI Industrial Cleaner Series provides a quality cleaning product for every area of your facility. Combine with our line of industrial dispensing equipment for a complete cleaning solution.

BSI-45

Degreasing Cleaner and Additive

Powerful medium foaming cleaner and degreaser and can be used alone for cleaning and degreasing of concrete, tile and steel.

Configurations: 5 gallon, 55 gallon, 275 gallon

BSI-100

RTU All-Purpose Hard Surface Cleaner

Ready-to-use hard surface cleaner. Very effective on greasy surfaces, leaves no smeary residue, and has a fresh, lemon fragrance.

Configurations: 1 gallon, 5 gallon, 55 gallon

BSI-101

Pine Oil Floor and Hard Surface Cleaner

Floor and hard surface cleaner containing pine oil. Removes tough grease and dirt and has a fresh, pine fragrance.

Configurations: 5 gallon, 55 gallon

BSI-102

Glass Cleaner

Non-streaking and highly evaporative glass cleaner. Requires dilution prior to use. Does not contain ammonia.

Configurations: 1 gallon, 5 gallon, 55 gallon

BSI-103

RTU Bathroom Cleaner

Ready-to-use bathroom cleaner. Recommended for cleaning showers, sinks, drinking fountains, faucets, etc. Effectively removes soap scum and film build-up.

Configurations: 1 gallon, 5 gallon, 55 gallon

BSI-104

RTU Bowl Bright

Ready-to-use toilet bowl and urinal cleaner. Effectively removes hard water deposits and rust.

Configurations: 5 gallon, 55 gallon

BSI-200**Aluminum-Safe High-Foaming Chlorinated Cleaner**

High-foaming, chlorinated cleaner designed for safe use on aluminum surfaces. Powerful cleaner for smoke residues, animal fats and oils, and surface oils. Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-215**Non-VOC Biodegradable Degreaser**

A water soluble, non-VOC, biodegradable degreaser. It is designed for degreasing floors, walls, metal, equipment and other hard surfaces.

Configurations: 5 gallon, 55 gallon, 275 gallon

BSI-225**High-Foaming All-Purpose Neutral Cleaner**

High-foaming, all-purpose cleaner and degreaser which contains no phosphates. Can be used as a base concentrate by adding acid or alkaline boosters. NSF registered, Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

Chemical Color Codes

General cleaners, neutral pH, safe on soft metals

Acid based cleaners for inorganic soils, low pH, use only on stainless steel or aluminum

Alkaline based cleaners for organic soils, high pH, use only on stainless steel and black iron

Additives

BSI-250**High-Foaming All-Purpose Alkaline Cleaner**

High-foaming, all-purpose cleaner and degreaser. May be applied by brush or with foaming units on equipment, utensils, walls, and floors in all departments of meat, poultry, and general food processing plants.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-275**Concentrated Liquid Warewashing Detergent**

A highly concentrated, fragrance-free liquid detergent designed to remove tough, baked-on foods for manual warewashing. It is an effective product to manually wash flatware, dishes, and utensils.

Configurations: 1 gallon, 5 gallon, 55 gallon

BSI-350

RTU Enzymatic Drain and Pipe Cleaner

Enzyme-based drain and pipe cleaner. It provides preventative and curative treatment to avoid blockage in pipes.

Configurations: 5 gallon, 55 gallon, 275 gallon

BSI-400

High-Foaming Acid Cleaner

High-foaming, heavy-duty liquid cleaner ideal for rapid soil attack and easy rinsing. Good for scale and deposit removal, and shining stainless steel surfaces. NSF registered, Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-500

High-Foaming Heavy-Duty Caustic Cleaner

High-foaming, heavy-duty caustic cleaner and degreaser. Contains powerful mixture of surfactants and chelating agents for use in difficult cleaning applications. Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-525

High-Foaming Chlorinated Cleaner

High-foaming, all-purpose liquid detergent which combines surface-active agents with the power of alkalinity and chlorine bleach. Contains sequestering and chelating additives for effective performance in hard water conditions. Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-550

Heavy-Duty CIP Cleaner

Non-foaming, liquid alkaline cleaner. Contains a powerful blend of caustic and sequestering agents. Designed to be used as a heavy duty CIP cleaner and features outstanding performance on hard-to-remove fat soils. Suited for rendering operations. Kosher certified.

Configurations: 1 gallon, 5 gallon, 55 gallon, 275 gallon

BSI-1300

Industrial General Purpose Defoamer

BSI-1300 is a highly effective 10% active industrial grade silicone antifoam emulsion. It combines excellent dilution stability with effective defoaming efficiency in a wide range of applications. This product can be used to suppress and control foam in both hot and cold applications over a wide pH range.

Configurations: 1 gallon, 5 gallon, 55 gallon

Perafoam Foam Additive

A very high foaming concentrate specially designed for use in conjunction with Best Sanitizers' peracetic acid sanitizer/disinfectant product, Alpet® PAA 5.6%. This product is an outstanding foam booster additive for many types of solutions. It has very stable, long-lasting foam characteristics.

Configurations: 1 gallon, 4.9 gallon, 54.2 gallon, 261.4 gallon, 325.9 gallon

Alpet® 70/30 RTU Industrial Cleaner

Ready-to-use cleaner for the entire facility. Highly evaporative and requires no rinsing. USP grade, Kosher certified isopropanol. De-ionized, purified water. Submicron filtered.

Configurations: 5 gallon, 50 gallon

Dry Step Floor Treatment

The formula for our Dry Step Floor Treatment combines alkalinity and multiple oxidizing compounds for reliable performance. Surfactants ensure that this product will penetrate into all cracks, crevices and porous surfaces where conventional floor treatments do not.

Configurations: 100 pound, 400 pound

Dry Step Bicarb Fine Floor Treatment

Fine-granulated floor treatment used to prevent slipping on production floors in meat, poultry, dairy and general processing plants. Contains sodium bicarbonate and surfactants which make it an effective deodorizer.

Configurations: 50 pound, 400 pound

Dry Step Bicarb Granulated Floor Treatment

Granulated floor treatment used to prevent slipping on production floors in meat, poultry, dairy and general processing plants. Due to its granulated form, product produces less dust than traditional powdered floor treatments and dissolves more slowly on wet floors.

Configurations: 40 pound, 400 pound

BSI Industrial Dispenser Series

Gallon Wall Bracket

Its simple design and stainless steel construction makes clean up a breeze.

1-2 Knockout Wrist-Activated Dispenser

Wall mountable, stainless steel construction. For use in wet or dry environments.

EZ-Step Wall-Mounted Foot-Activated Dispenser

This durable hands-free, foot-activated unit can dispense any of our one gallon bottles of soap or sanitizer.

EZ-Step2 Portable Foot-Activated Dispenser

Our most popular industrial dispensing system within the food processing industry.

For use with sanitizer spray only.

Champion Multi-Line Dispensing System

The Champion is a touchless, automatic, multi-line dispensing system designed to dispense our liquid soaps or sanitizer sprays. The Champion uses a 2-Gallon capacity reservoir and can accommodate from 1 to 5 dispensers.

Prizefighter Dispensing System

The Prizefighter is a touchless, automatic, dispenser, constructed of stainless steel and ideal for use in wet or dry environments. Infrared sensors detect the presence of hands and dispense a premeasured application of our liquid soaps or sanitizer sprays. Uses a 3000mL capacity reservoir.

Hand, Hair & Body Soap

Each of the BSX Boot Scrubbers use an open, sanitary design which eliminates hidden and hard to reach areas that are difficult to clean and can harbour pathogens. Components of each unit can be easily removed for cleaning and inspection.

BSX1000 High Capacity Walk Through Boot Scrubber Unit - Wet

The BSX1000 is designed for facilities where high throughput is critical. The user activates the system by stepping onto the platform. Diluted cleaning solution is sprayed onto rotating brushes and transferred onto the boots from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. We recommend using Alpet® No-Rinse Quat Sanitizer with the BSX1000 to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The BSX1000 is available with various brush configurations to better meet your specific needs – contact a Best Sanitizers representative for details. Each of these configurations provide multiple points of contact between brush and boot. These units are designed for larger spaces and higher traffic applications.

BSX900 Compact Walk-Through Boot Scrubber Unit with Dual Sole Brushes - Wet

The user activates the system by stepping onto the platform. Diluted cleaning solution is sprayed onto rotating brushes and transferred onto the boots from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. We recommend using Alpet® No-Rinse Quat Sanitizer to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The BSX900 uses two rotating horizontal sole brushes, has a small footprint, and is ideal for tight spaces and medium traffic applications.

BSX800 Compact Walk Through Boot Scrubber Unit - Wet

The user activates the system by stepping onto the platform. Diluted cleaning solution is sprayed onto rotating brushes and transferred onto the boots from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. We recommend using Alpet® No-Rinse Quat Sanitizer to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The BSX800 is available with various brush configurations to better meet your specific needs – contact a Best Sanitizers representative for details. The BSX800 has a small footprint and is ideal for tight spaces and medium traffic applications.

ITEM #	PRODUCT DESCRIPTION
BSX1000-DAF	Boot Scrubber w/ Sole Brush & 2-1/2" Side Disk and Sanitary Leveling Feet
BSX1000S-DAF	Boot Scrubber w/ Sole Brush Only and Sanitary Leveling Feet
BSX1000V-DAF-6	Boot Scrubber w/ Sole & 6" Tall Brushes and Sanitary Leveling Feet
BSX1000V-DAF-9	Boot Scrubber w/ Sole & 9" Tall Brushes and Sanitary Leveling Feet
BSX900-DAF-115V	BSX900 Boot Scrubber Compact Walk-Through Unit W/ Dual Sole Brushes - 115VAC, 230VAC & 480VAC available
BSX800-DAF	Boot Scrubber w/ Sole & 2-1/2" Side Disk Brushes and Sanitary Leveling Feet
BSX800V-DAF-6	Boot Scrubber w/ Sole & 6" Tall Vertical Brushes and Sanitary Leveling Feet
BSX800V-DAF-9	Boot Scrubber w/ Sole & 9" Tall Vertical Brushes and Sanitary Leveling Feet

BSX600 Single Boot Scrubber Unit w/ Triple Rotating Brushes - Wet

The user places one foot at a time into the unit and activates the system by grabbing the hand rail. We recommend using Alpet® No-Rinse Quat Sanitizer to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). Two rotating side brushes and one rotating sole brush clean the boot while cleaning solution and water is sprayed onto the brushes through a stainless steel venturi dilution valve and metering tip to provide the desired PPM. The BSX600 is ideal for tight spaces and low traffic applications.

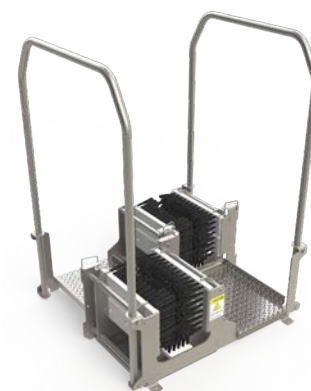

BSX400 Single Boot Scrubber Unit - Wet

The BSX400 is a wet, single boot scrubber. It uses two stationary side brushes and one rotating sole brush to thoroughly clean the boot. The user places one foot at a time into the unit and activates the system by grabbing the hand rail. We recommend using Alpet® No-Rinse Quat Sanitizer to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). Diluted cleaning solution is sprayed onto the brushes and transferred onto the boot from a stainless steel venturi dilution valve and metering tip to provide the desired PPM. The BSX400 is ideal for tight spaces and low traffic applications.

BSX200 Dual Boot Scrubber Unit

The BSX200 is a rugged, walk through, dual boot scrubber available in a wet or dry version. With the wet unit, the system is activated when a user steps onto the platform. Cleaning solution is sprayed onto the boot and brushes. We recommend using Alpet® No-Rinse Quat Sanitizer with the BSX200 to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The user moves their boot back and forth through the brushes supplying the mechanical scrubbing action. The BSX200 is ideal for tight spaces and low traffic applications.

BSX100 Single Boot Scrubber Unit

The BSX100 is a rugged, single boot scrubber available in a wet or dry version. With the wet unit, the system is activated when a user steps onto the platform. Cleaning solution is sprayed onto the boot and brushes. We recommend using Alpet® No-Rinse Quat Sanitizer to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear). The user moves their boot back and forth through the brushes supplying the mechanical scrubbing action. The BSX100 is ideal for tight spaces and low traffic applications.

Use Alpet® No-Rinse Quat Sanitizer with all our BSX Boot Scrubbers to aid in the cleaning of footwear prior to sanitizing (sanitization can only occur on pre-cleaned footwear).

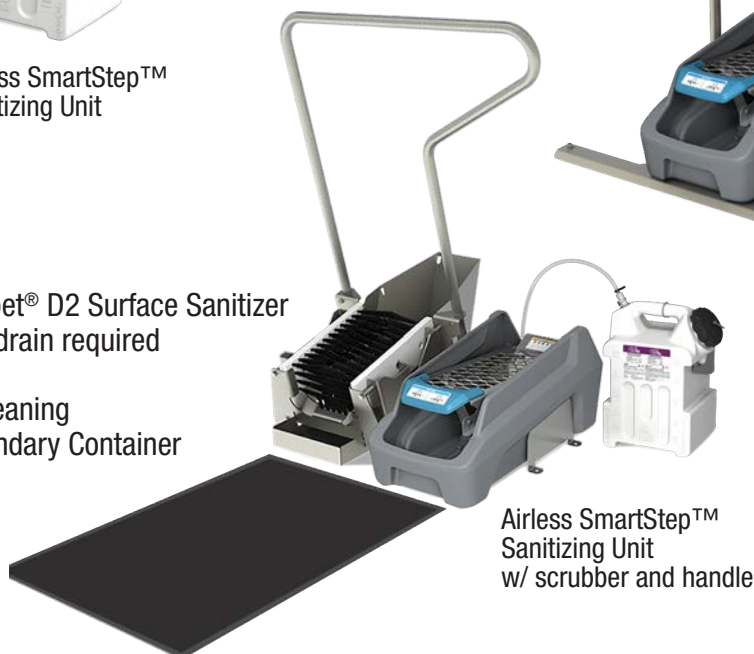

FIGHTING CROSS-CONTAMINATION IN ANY FACILITY

BEST SANITIZERS INC. **SmartStep™** Footwear Sanitizing Systems

AIRLESS **SmartStep™** Footwear Sanitizing System

- Activated by the force of a human step
- Every step delivers a fresh spray of Alpet® D2 Surface Sanitizer
- Sets up in minutes in any location, no drain required
- Four nozzles for consistent coverage
- Collection basin easily accessed for cleaning
- Each unit ships with a 2.5 gallon Secondary Container

ITEM #	PRODUCT DESCRIPTION
ADB0004	Airless SmartStep Footwear Sanitizing Unit, includes USP20028
ADB0004-MH	Airless SmartStep Sanitizing Unit w/ handle, includes USP20028
ADB0004-BS	Airless SmartStep Sanitizing Unit w/ scrubber and handle, includes USP20028
USP20069	Secondary Jug Tag for Alpet D2 (Yellow)
USP20130	Secondary Jug Tag for Alpet D2 Quat-Free (Yellow)
SS10002-BSS	Alpet® D2 Surface Sanitizer 5 gallon pail w/ insert & dip tube (for use with ADB0002, ADB0003 & ADB0004)
SS10031-BSS	Alpet® D2 Quat-Free Surface Sanitizer 5 gallon pail w/ insert & dip tube (for use with ADB0002, ADB0003 & ADB0004)
SS20001	Alpet® D2 Secondary Cont. 2.5 gallon pail (empty) w/ hang tag and SS mounting bracket (for use with ADB0002, ADB0003 & ADB0004)
SS20013	Alpet® D2 Quat-Free Secondary Cont. 2.5 gallon pail (empty) w/ hang tag and SS mounting bracket (for use with ADB0002, ADB0003 & ADB0004)
USP20028	Safety Feed Adaptor (for use with SS10002-BSS and SS10031-BSS)
USP20027-SM	Flex Tip Mat - Small (24" x 32")
USP20027-L	Flex Tip Mat - Large (36" x 72")

HACCP **SmartStep**[™] Footwear Sanitizing System

- Foot-operated unit uses compressed air to deliver an atomized spray of Alpet® D2 or Alpet® D2 Quat-Free Surface Sanitizer onto footwear soles
- Spray provides ample coverage to footwear soles
- Uses only 0.2 ounces of chemical, minimizing waste and improving moisture control
- The reduced footprint means you can place multiple units throughout the facility

Stop pathogens in their tracks, anywhere!

SmartStep[™]
Footwear Sanitizing
Unit w/ Handle

HACCP **SmartStep²**[™] Walk-Through Dual Footwear Sanitizing Unit

- Compact footprint (27 in. L x 33 in. W x 44 in. H)
- Sturdy stainless-steel construction
- Uses compressed air and requires no electricity
- Dual footwear, walk-through design provides greater throughput
- Eight atomizing spray nozzles (four per boot) provide ample coverage
- Unit will not activate until both feet are in place
- Comes with air regulator and inline sediment filter

Adding a "Flex Tip Mat" with one of our **Dry Step Floor Treatments** provides a sure-footed surface for exiting the sanitizing station.

Proportioning & Dispensing Equipment

Foamer w/ Gauges

This foamer with gauges is a medium volume foam applicator for projecting foaming chemicals on to any surface up close or at a distance.

Spray-All

Water-driven, medium volume spray applicator for applying chemical solutions to a variety of surfaces.

1-Way Push Lever Mixing Station

Chemical proportioner for accurately diluting a chemical concentrate to the required ratio and filling any sized container with diluted, ready-to-use chemical solution.

Airless Foam / Rinse / Sanitize Applicator With Pistol Grip Gun Kit

Combination applicator with a rinse mode. This venturi injection system uses standard city water pressure to draw and blend chemical concentrate.

ITEM #	PRODUCT DESCRIPTION
MD20001	BSI Foamer With Gauges (includes 20 dilution ratio tips, 40' discharge hose and wand)
MD20002	BSI Spray-All (includes 20 dilution ratio tips, 50' discharge hose and wand)
MD20003	BSI 1-Way Push Lever Mixing Station (includes 20 dilution ratio tips) (specify for low rate, high rate or bottle fill)
MD20008	BSI Airless Foam / Rinse / Sanitize Applicator (includes 20 dilution ratio tips, 50' discharge hose, gun kit and wand)

Add an additional layer of pathogen protection to critical control areas in your food plant with a DFX Doorway Foamer. These foamers lay down a thick carpet of sanitizing foam in doorways, dock doors and other ingress and egress areas where there is a potential risk of cross-contamination from foot traffic, forklift wheels, carts and other transportation equipment.

DFX Doorway Foamers Available with your choice of Santoprene, Viton or Kalrez seals

For use with PRE-MIX		For use with CONCENTRATE	
DFX0001 Single-Line Pre-Mix Doorway Foam Unit	DFX0002 Twin-Line Pre-Mix Doorway Foam Unit	DFX0003 Single-Line Concentrate Doorway Foam Unit	DFX0004 Twin-Line Concentrate Doorway Foam Unit

ITEM #	PRODUCT DESCRIPTION
DFX0001	Single-Line Pre-Mix Doorway Foam Unit
DFX0002	Twin-Line Pre-Mix Doorway Foam Unit
DFX0003	Single-Line Concentrate Doorway Foam Unit
DFX0004	Twin-Line Concentrate Doorway Foam Unit

Proportioning & Dispensing Equipment

BSI Airless Foamer

Medium volume foam applicator for projecting foaming chemicals on to any surface up close or at distances up to 6 feet without compressed air. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution.

Chemical Transfer Unit

Transfers a single product at up to 5 gal/min (18.9 l/min). Unit is available in two different operating types: manual air button or timer with solenoid valve. Available with your choice of Santoprene, Viton or Kalrez seals. Includes suction and discharge hoses.

Wall-Mounted Spray Unit

This wall-mounted spray unit uses compressed air to provide consistent dilution rates. Draws from concentrate. Comes with an assortment of metering tips to provide the desired PPM.

Wall-Mounted Foam Unit

This wall-mounted foaming unit uses compressed air to provide consistent dilution rates. Draws from concentrate. Comes with an assortment of metering tips to provide the desired PPM.

Wall-Mounted Foam / Sanitize Unit

Save space with two systems in one enclosure. This wall-mounted foam/sanitize unit has separate systems contained in the same housing which allows you to use the foam and sanitizing functions separately or at the same time, without the risk of cross-contamination between products.

Stainless Steel Drum Pump

High quality stainless steel drum pump for all compatible Best Sanitizers products.

Plastic Drum Pump

Economical drum pump for all compatible Best Sanitizers, Inc. products.

ITEM #	PRODUCT DESCRIPTION
MD20009	BSI Airless Foamer (includes 20 dilution ratio tips, 50' discharge hose and airless foam wand)
MD20010	BSI Chemical Transfer Unit - Santoprene pump seals and manual air button (includes 8' discharge hose and suction line)
MD20011	BSI Chemical Transfer Unit - Santoprene pump seals, timer and solenoid valve (includes 8' discharge hose and suction line)
MD20012	BSI Chemical Transfer Unit - Viton pump seals and manual air button (includes 8' discharge hose and suction line)
MD20013	BSI Chemical Transfer Unit - Viton pump seals and timer and solenoid valve (includes 8' discharge hose and suction line)

MD20015	BSI Chemical Transfer Unit - Kalrez pump seals and timer and solenoid valve (includes 8' discharge hose and suction line)
MD20016	BSI Wall-Mounted Foam Unit - (includes 20 dilution ratio tips, 50' discharge hose and foam wand)
MD20017	BSI Wall-Mounted Spray Unit - (includes 20 dilution ratio tips, 50' discharge hose and spray gun)
MD20018	BSI Wall-Mounted Foam/Sanitize Unit - (includes 20 dilution ratio tips, two 50' discharge hoses with foam wand/spray gun)
USP20106-S	Drum Pump - Stainless Steel
USP20105-P	Drum Pump - Plastic

Proportioning & Dispensing Equipment

BSI Blend Center 633

BSI Blend Center 633's modular design lets you easily couple together any number of stations to create a system to meet your needs. Mix and match 1 gpm (4 liters / min.) and 4 gpm (15 liters / min.) and choose from blue, red, green, yellow, black, or white buttons. Models include either Action Gap or Air Gap backflow protection.

BSI MixRite

The BSI DEMA MixRite is powered by water flow, with minimal loss of pressure. The water engine powers the proportioning unit. No external power is required. The proportioning unit injects liquid additives in direct relation to the amount of water that passes through the motor and injects the additives into the water system.

Dilution at Hand™

The Dilution at Hand™ (DAH) Extreme has a sleek design and enhanced color scheme that provides a modern appearance in any housekeeping environment plus multiple features to enhance productivity and dispensing flexibility. Its modular design allows the dispensers to be used with or without locking cabinets and with or without selector valves for the ultimate flexibility from 1 to 4 products or multiple dilutions for 1 plus product.

Dilution at Hand™ Extreme features:

- Remote fill option for easy filling of buckets and scrubbers when location flexibility is required
- One-hand bottle fill allows operator more flexibility when filling spray bottles
- Action Gap and Air Gap backflow options to meet local plumbing agency requirements
- Optional multi-product / dilution selector valves are available in single or dual options for up to 4 products or dilutions
- 1 gallon-per-minute flow control disc improves dispensing accuracy with ultra lean dilutions
- Optional 1 gallon (5L) or 2 liter (1/2 gal) locking enclosures for various bottle sizes
- Single Station or Dual Station available

ITEM #	PRODUCT DESCRIPTION
USP20182	BSI Blend Center 633
USP20215	BSI MixRite 1400M Injector (0.03-0.2% 500:1-3000:1 14GPM)

Dispensing Equipment: Foamers & Sprayers

30 Gallon Portable Spray Unit

This portable sprayer uses compressed air and pre-mixed chemicals to deliver chemistry wherever you need it. Innovative design makes operation and maintenance a breeze. See-through tank provides easy solution level monitoring.

10 Gallon Portable Foaming Unit
20 Gallon Portable Foaming Unit

These portable foaming units use compressed air and pre-mixed chemicals to deliver a foaming solution wherever you need it. Innovative design makes operation and maintenance a breeze. Precise adjustments for wet or dry foam. See-through tank provides easy solution level monitoring.

3 Gallon Pump-Up Foamer
3 Gallon Pump-Up Sprayer

Heavy-duty, portable, 3 gallon pump-up foamer and pump-up sprayer for applying ready-to-use chemicals on to any surface. Equipped with a compressed air “quick charge” valve to eliminate pumping.

5 Liter Pump-Up Foamer
5 Liter Pump-Sprayer

Comfortable grip handle with trigger for quick on/off. Wand holder on tank for easy storage. Pressure relief valve for safety. Viton seals for chemical compatibility. Natural color tank for easy visibility of product levels.

ITEM #	PRODUCT DESCRIPTION
USP20141	30 Gallon Portable Spray Unit w/ specify Santo, Kalrez or Viton (includes 30' hose and discharge wand)

USP20109	Pump-Up Foamer - 5 liter - secondary container

Dispensing Equipment: Foamers, Sprayers & Drain Foaming Attachments

15 Gallon Battery-Powered Portable Foaming Unit

Portable foaming unit with up to 2 hours of non-continuous run time from one charge. Draws from pre-mixed solution. Integrated hose wraps. Optimized for use with low-foaming products. Produces a lower volume of foam than air-operated units. Ideal for drain foaming, spot cleaning and more.

22 oz Compact Foamer 22 oz Compact Sprayer

Medium volume hose-end foam and spray applicators for diluting and applying chemicals. Quick disconnect to rinse. Comes with 20 color-coded metering tips for setting dilution ratios.

Drain Foaming Attachment

Use the stainless steel disc or rubber stopper to accommodate drains 3.5" to 12" and pump foaming cleaner to fill drain pipes. *Use with our 10, 15 and 20 Gallon Portable Foaming Units.*

Trench Drain Foaming Attachment

Clean trench drains and grates. Disc with brushes helps to clean grates, while the foam cleaner penetrates hard to reach areas. *Use with our 10, 15 and 20 Gallon Portable Foaming Units.*

1.5 Liter Pump-Up Foamer 1.5 Liter Pump-Up Sprayer

Maximum portability for small jobs and spot cleaning. Comfortable grip handle with trigger for quick on/off control. Pressure relief valve for safety. Viton seals for chemical compatibility.

Give us a call for a complete list of the sprayers & foamers we have available!

Proper hand hygiene, surface cleaning and sanitation practices are the first lines of defense against cross-contamination in your facility. Schedule your session today, either onsite or via the web, and get expert guidance and training from Best Sanitizers!

JOINT ON-SITE HAND HYGIENE TRAINING CLASS FOR YOUR CUSTOMERS

HAND SANITIZING STATION
ESTACIÓN DE DESINFECCIÓN DE MANOS

DO YOU KNOW... Where Germs Hide?
The darker areas indicate the areas of the hands most often missed in handwashing: Under the fingernails, under the cuticles, and in the creases and crevices of your fingers and hands.

¿SABE USTED... Donde se esconden los gérmenes?
Las zonas más oscuras indican las áreas de las manos que con más frecuencia se pasan por alto durante el lavado de manos: Debajo de las uñas, debajo de las cutículas y en las líneas y pliegues de los dedos y las manos.

Atomization of hand sanitizer kills germs hiding in the creases and crevices.

La atomización del desinfectante para manos mata los gérmenes que se esconden en las líneas y pliegues.

1. Receive atomized sanitizer into palms, and finger tip area. *Recibir el desinfectante atomizado en las palmas y la punta de los dedos.*

2. Rub hands together vigorously. *Frotarse las manos vigorosamente.*

3. Continue until hands are dry. *Continuar hasta que las manos estén secas.*
