

BSI Airless Foam/Rinse/Sanitize Applicator With Pistol Grip Gun Kit

The BSI Airless Foam/Rinse/Sanitize System is a combination applicator with a rinse mode. This venturi injection system uses standard city water pressure (35 - 125 PSI) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. The foaming solution then flows through the discharge hose to the airless foam wand which draws in atmospheric air to create and project wet, clinging foam on to any surface up close or at distances up to 6 feet. Quick connect the pistol grip gun to apply sanitizer or to rinse at full pressure.

Key Features

- Designed for foam cleaning, rinsing and sanitizing medium to large sized areas where compressed air is not available
- Projects wet, clinging foam which increases chemical contact time and effectiveness
- Foaming expands the chemical and reduces over application by providing visual assurance of coverage
- Quick connect the pistol grip gun to rinse at full pressure and to apply sanitizer as a fan pattern spray
- Chemical resistant components ensure years of outstanding performance with minimal maintenance
- Use it where 35-125 PSI water is available

Includes

- Machined polypropylene manifold and injector body
- Ball valves to alternate foaming, rinsing and sanitizing
- 20 color-coded precision metering tips to set dilution ratios
- 50' hose and discharge assembly
- Quick connect machined polypropylene airless foam wand
- Quick connect insulated pistol grip gun with PVDF fan nozzle and nozzle protector
