To Whom It May Concern,

ALPET D2 Surface Sanitizing Wipes are an alcohol/quat based sanitizer formulated for application to surfaces and water sensitive equipment. The ingredients are Water, isopropyl alcohol, glycerin, and dimethylammonium chloride. None of these is generally recognized as allergens. In preparing the formula, there is not any soy components, almond oil, peanut components, tree oil or other well-known allergens added.

Sincerely,

A handwritten signature in blue ink, appearing to read 'C. Linville', is positioned above the typed name.
