

January 3, 2023

To Whom It May Concern,

SmartSan Hand Sanitizer Foam is an alcohol-based hand sanitizer, which is formulated from Water, Specially Denatured Alcohol 40B, FCC grade Glycerin, and surfactants.

None of these are generally recognized as allergens. They are all the purest grades available.

Sincerely,

A handwritten signature in blue ink, appearing to read 'C. Linville', is positioned above the typed name.
